

# Warrior 1800

Designed for medium to large operators, where high capacity and throughput are paramount, the Powerscreen® Warrior 1800 is a tough, heavy duty machine built for screening, 2 or 3 way splitting and stockpiling in quarrying, recycling, construction and demolition aggregates and top soil applications.

With low ground pressure crawler tracks the Warrior 1800 is highly mobile. The versatile screen accepts a wide range of media options including bofor bars, finger screens, woven mesh and punch plates.

## Features & Benefits

- Heavy duty, incline belt feeder with hydraulic hopper sides
- Heavy duty, adjustable angle, grease lubricated 2 bearing, 2 deck screen box
- Jack up screen facility to aid mesh changes
- Hydraulic "slide out facility" on oversize tail conveyor to ease mesh changes
- Screen walkway and access steps
- Hydraulic folding conveyors with excellent stockpiling capacity
- Engine protection shutdown system

## Options

- Radio controlled tracking
- Dual power (additional electric hydraulic drive)
- Quick release screen wedge tensioning
- Auto lubrication system
- Dust suppression
- Wide range of screen media
- 2 or 3 way split configuration
- High capacity incline apron feeder

Output Potential: up to 600 tph (661 US tph)

| Warrior 1800 (Incline Belt Feeder) | 3 Way Split            |
|------------------------------------|------------------------|
| Weight (Est)                       | 30,000kgs (66,139lbs)  |
| Transport width                    | 2.9m (9'6")            |
| Transport length                   | 15.38m (50'6")         |
| Transport height                   | 3.4m (11'2")           |
| Working width                      | 12.62m (41'5")         |
| Working length                     | 14.40m (47'5")         |
| Working height                     | 4.57m (14')            |
| Screen unit                        | 4.8m x 1.5m (16' x 5') |
